ABOUT

I'm a Frontend Developer with 2 years of professional experience, having grown from an intern to a Software Specialist at the same company. I specialize in building modern web and mobile applications using React, Next.js, Nuxt.js, and React Native, with additional experience in Kotlin Android Development. I thrive in collaborative team environments where clear communication and shared ownership drive the best results. I'm currently seeking a fully remote and flexible position where I can continue delivering high-quality digital experiences.

EDUCATION

Istanbul Kültür Üniversitesi (2023-2025)

Computer Programming

GPA: 3,33/4

TECHNICAL TOOLS

- Frontend: Next.js · React · Nuxt.js · Vue · React Native · TypeScript
- UI & Styling: Tailwind CSS · HeroUI · shadcn/ui · Ant Design
- Backend & API: NestJS · GraphQL
- CMS Directus Strapi
- Mobile Kotlin: · MVVM
- Tools & Other: Storybook Maestro

EXPERIENCE

- Villa Sepeti Contributed to a villa rental platform serving thousands of listings, improving UI consistency across 10+ page templates.
- HiringCycle Delivered the landing website from scratch, reducing time-to-launch by collaborating closely with the design team.
- Brooks Brothers (Android — Maintenance) Resolved 20+ bugs and performance issues, improving app stability and user retention.
- Lee Wrangler (Android — Maintenance) Maintained the mobile app, addressing critical issues across multiple release cycles.
- Koç Digital Built a scalable CMS-driven website, enabling the content team to manage 50+ pages independently.
- Sensat Developed multiple web interfaces, contributing to a platform used by engineering and infrastructure teams globally.
- DOD Improved frontend performance and page consistency across the e-commerce platform.
- Yenasoft & Yenaplus Delivered a CMS-driven website, empowering non-technical teams to manage content across 30+ pages.
- Ollimpus (Personal Project) Built a book highlights manager from end to end, handling both frontend and backend independently.
